She responded as follows: I will need time to re-start the GC. It hasn't been utilized for 6 months or more. I have no idea of the condition of the column. However, I have only 3 days /week to work on this.

Sue,

The lab has been involved in running some analyses for the West Virginia Chemical Leak. We would like you to analyze the sample for GC/IR. Eric is going to dilute the sample and provide you with the dilution in methylene chloride.

Sue
